Reiniger R1 Autobody Repair Primer.

83 19 2 211 217, 100mL/3.38 fl oz

Product Description

The Reiniger R1 is used to clean surfaces before they are glued.

Advantages

- Surfaces are cleaned by the Reiniger R1 in a very gentle manner.
- Cleaning of various materials such as glass, paint and plastic parts is possible.
- Particularly effective removal of non-polar contaminants such as oils and greases.

Features

A surface preparation with the Reiniger R1 is essential for an optimum adhesion.

Quality Protection

The cleaner was specially developed to meet BMW specifications. The compatibility was tested with adhesives approved for the BMW Service.

Economy

Due to the mixture of heptane isomers, maximum cleaning performance is achieved by using only small product quantities.

Competitive Comparison

This is the only product approved by BMW.
